

RRA set to announce GM

THE SEARCH FOR A NEW GENERAL MANAGER AT REFRIGERANT RECLAIM AUSTRALIA (RRA) HAS ENDED WITH KYLIE FARRELLEY COMMENCING WORK WITH THE ORGANISATION LAST MONTH.

THE FORMER MANAGER of Arkema's fluoro-chemical business and chair of Refrigerants Australia (RA) is well versed in all aspects of the RAC trade and refrigerant technologies.

Farrelley has replaced former general manager, Michael Bennett, who announced plans to step aside in December last year.

No formal announcement regarding Farrelley's appointment had been made at press time. For updates go to www.climate-controlnews.com.au

Bennett has helped make the RRA a global leader in the recovery and safe disposal of ozone depleting and synthetic greenhouse gas refrigerants.

And while he will continue to work at RRA his focus will be on more specific research programs and training initiatives with TAFE. In recent months Bennett has been working on a video series on the technical aspects of refrigerant recovery for RAC students as well as a number of introductory videos promoting the RAC

industry. PricewaterhouseCoopers began the search for a new general manager in December last year. Farrelley certainly has an impressive track record in the Australian RAC industry, especially in the area of refrigerants. She was elected RA chair in March, 2018.

The position of chair is held for a two year period when the Board can either elect a new chair or re-elect the incumbent.
